

PHOS 5

Phos 5 is a powerful phosphoric acid based toilet and urinal cleaner with a fresh lasting fragrance. It has been designed to eliminate the toughest stains and build up from urinals, toilet bowls and tiled surfaces.

DIRECTIONS FOR USE

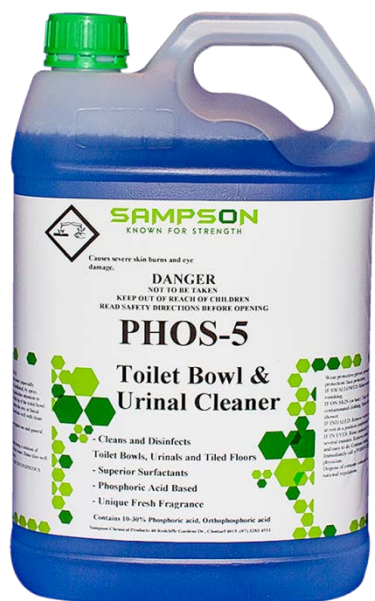

Use Phos 5 neat for heavily soiled toilets and urinals. For frequent use in lighter soiling or as a "Total Washroom Cleaner" dilute up to 40:1 with water.

Toilet Bowls: Flush toilet first, then direct a stream of Phos 5 under the rim. Use a toilet brush to swab the solution around the bowls before brushing under the rim. Flush the toilet.

Urinals: Flush the cistern, apply Phos 5 to the areas to be cleaned, scrub with a brush, and then flush again.

Ensure all surfaces to be cleaned are wet prior to applying Phos 5 to avoid chemical damage to the surface being cleaned and assist in applying the product evenly.

Tiled Floors: Rinse tiles first. Apply by mop using a solution of 250mLs per 10L of warm to hot water. Rinse tiles well with clean water at completion.

SAFETY NOTES

Phos 5 can cause severe skin burns and eye damage. Glove and safety glasses are highly recommended when handling this product. Consult Safety Data Sheet before handling this product.
