

## SUPERCLENE

Supercleane is a heavy duty general purpose cleaner/degreaser concentrate possessing quick break properties. It's unique combination of biodegradable natural orange oil extract, anionic and non-ionic surfactants and powerful builders combine to give excellent performance in almost any application. When diluted as recommended, it can be used for virtually any cleaning application, including degreasing, heavy duty vehicle washing, workshop floor cleaning and the cleaning of trawlers and oilrigs. The quick break property of Supercleane ensures that the emulsified grease and oil rapidly separate in a grease trap, allowing the resultant water layer (after pH post-treatment) to be drained to the sewer as treated trade waste.

### DIRECTIONS FOR USE:

- For degreasing, dilute 1 part Supercleane with up to 3 parts water. Brush or spray on, leave for 5-10 minutes to aid penetration, then hose off.
- For washing cars, trucks and buses, dilute 1 part Supercleane with up to 30 parts water. Apply by sponge or using spray equipment, then rinse with high pressure water.
- For cleaning workshop floors, dilute 1 part Supercleane with 5 parts water. Apply by brush, leave for 10-15 minutes to aid penetration, rework stubborn stains again with the brush, then hose off.
- For use on trawlers and as a rig wash, dilute 1 part Supercleane with up to 30 parts water, depending on the degree of soiling. Apply using spray equipment or a mop, then rinse with high pressure water.
- For general cleaning, dilute 1 part Supercleane with 30-100 parts of water, depending on the degree of soiling.

### APPEARANCE:

Slightly viscous orange liquid, orange fragrance. (pH – 12.5)

### COMPOSITION:

Aqueous blend of surfactants, hydro tropes, builders, orange oil extracts, viscosity modifier, preservative and dye.

### BIODEGRADABILITY:

The surfactants used in Supercleane pass the biodegradability test set out in AS1792-1976 and are classified as biologically soft.
