There are many options when it comes to soap, sanitiser and dispensers. Tork® can help you decide what is best for your business. Our liquid and foam systems are more hygienic than bulk soap as they are sealed to keep them free of contaminants. Our wide range of refills provide a thorough clean but are also gentle on skin to encourage frequent use.

### Why Tork?

---

#### **We understand hygiene**

Whether you need soap for staff washrooms, body wash for showers or hand soap for a wash station in a kitchen, hygiene is important. Your needs determine the best solution with a choice of liquid or foam soap, soft push, arm lever or sensor-driven dispensers. With Tork, hygiene is in your hands.

#### **We improve efficiency**

Not only do Tork Liquid and Foam Soaps prevent contamination with hygienic, vacuum-sealed cartridges and single-use pumps, they are also quick to changeover and mess-free so they reduce maintenance time and costs. In fact, refills take just 3 seconds to replace.

#### **We deliver a better experience**

As part of our fully coordinated dispenser ranges, our exceptionally well-designed Tork Soap dispensers look better, work better and make a better impression. Our soft push dispensers are easy for everyone to use and are certified by the Swedish Rheumatism Association.

#### **You can make a responsible choice**

Refills with EU Ecolabel certification have a lower impact on air, water, soil and human health throughout their life cycle. Collapsible cartridge bottles are made of recyclable plastic and reduce waste volume by 70%.

# Steps to selecting the right soap products

# 1

## Select your soap needs

Identify what is the most important requirement. Everyday use, hygiene, food safety, sensitive skin, heavy duty or luxury.

# 2

## Select your application

Do you need soap for hand washing or hair and body washing? Or do you need a sanitiser for use without water, for hands or surfaces?

Soap needs	Hand washing			
	Standard	Touch-free dispensing	Value	Compact
<b>Everyday</b> Washrooms and wash stations. Economical systems that are easy to use and maintain.	 Mild Liquid Soap	 Mild Foam Soap	 Mild Foam Soap	 Mild Mini Liquid Soap
<b>Hygiene</b> Healthcare, aged care, child care washrooms and wash stations. When hygiene is critical.	 Hand Washing Liquid Soap	 Hand Washing Liquid Soap	 Antimicrobial Foam Soap	
<b>Food safety</b> Kitchens, food service & production. When a food-safe hand wash is required.	 Hand Washing Liquid Soap	 Antimicrobial Foam Soap	 Antimicrobial Foam Soap	
<b>Sensitive skin</b> For frequent hand washing. Mild ingredients, perfume free and colour free, to reduce the risk of skin irritation.		 Extra Mild Foam Soap	 Extra Mild Foam Soap	
<b>Heavy duty</b> Industrial strength. Formulated with a lipid-dissolving ingredient that's highly effective, yet gentle on the skin.	 Oil and Grease Liquid Soap			
<b>Luxury</b> Premium quality to help you to make the best impression.	 Luxury Soft Foam Soap	 Luxury Soft Foam Soap		

# 3

## Choose your system

Use the matrix below to help you decide what's the next most important attribute. Is it standard or touch-free dispensing, value or compact (space saving)?

- S1
- S2
- S4

Hair & body washing		Hand sanitising		Surface sanitising	
Standard	Compact	Standard	Compact		
 <p>S1 Hair &amp; Body Liquid Soap</p>	 <p>S2 Hair &amp; Body Liquid Mini Soap</p>	 <p>S1 Alcohol Gel Hand Sanitiser</p>	 <p>Alcohol Foam Hand Sanitiser</p>	 <p>S2 Surface Cleaner</p>	Everyday
 <p>S1 Hair &amp; Body Liquid Soap</p>	 <p>S2 Hair &amp; Body Liquid Mini Soap</p>	 <p>S1 Alcohol Gel Hand Sanitiser</p>	 <p>Alcohol Foam Hand Sanitiser</p>	 <p>S2 Surface Cleaner</p>	

## The difference between liquid and foam soap

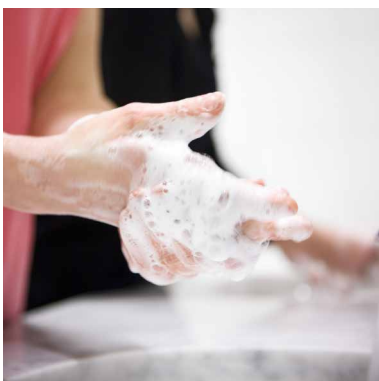

- 💧
- S1
- S2

### Tork Liquid Soap

**Dosage** – The larger dose of liquid soap (~1 ml) takes longer to lather and rinse off, so it encourages an optimal 20 second hand wash.

**Hygiene** – The larger dose of liquid soap encourages a more thorough hand wash. Liquid soap contains glyceryl oleate, a natural human skin lipid. It replenishes the skin's protective layer so hands are less likely to pick up dirt and micro-organisms.

- 💧
- S4

### Tork Foam Soap

**Dosage** – The dose of foam soap (~0.4 ml) is easy to lather, so encourages a quick hand wash.

**Value** – Due to the lower dosage, foam soap is a better value-conscious choice.

# The Tork Soap difference

Sealed liquid and foam systems are the most hygienic ways to deliver soap and sanitisers. And they're quicker and easier to maintain.

No drips or leaks with all in one cartridge and pump

Quick 3 second cartridge changeover with no mess

Refill name clearly visible through dispenser for easy identification

No bacteria build up with sealed cartridge system

System number makes re-ordering easy

pH value is in the same range as normal skin to maintain skin's natural balance

Changing a refill whether Tork Liquid Soap (top) or Tork Foam Soap (bottom) takes just three seconds.

- 1** Open the dispenser, take out the empty bottle and recycle
- 2** To open the seal of the new bottle, either turn (liquid) or twist (foam) the cap according to label instruction
- 3** Place refill in dispenser, close and it's ready to use

Hand hygiene plays an essential role in keeping us healthy and reducing the risk of spreading infections and germs.

- Hand washing with soap helps us to remove dirt and many harmful germs
- Soap mixed with water creates lather which efficiently breaks down and dissolves dirt, oils and fats
- Germs love wet or moist hands so drying hands is as important as washing
- Clean, dry hands are safe hands

Whether it's liquid soap or foam soap the steps to clean hands are the same

Wet hands with warm water

Lather liquid or foam soap for 20 seconds

Rinse clean

Dry with paper towel

Dermatological and environmental testing and certifications ensure you get the right soap for your needs.

#### Ecolabels

Seven Tork soap refills have been awarded the strict **EU Ecolabel**. Products with the EU Ecolabel have a lower impact on air, water, soil and human health throughout their life cycle.

#### Industry approval/certified

**HACCP** (Hazard Analysis and Critical Control Points) is an internationally recognised risk management system identifying, evaluating and controlling hazards related to food safety.

**AssureQuality** provides food safety and biosecurity services to the food and primary production sectors worldwide and registers products appropriate for incidental food contact.

The **Ministry for Primary Industries (MPI)** is a New Zealand government department that approves products appropriate for use with processing all animal products other than dairy.

#### Product certification

**ProDerm** dermatologically approved products have been put through stringent dermatological clinical testing by leading international research organisation.

**European Norms (EN)** is a standard that has been adopted by one of the three recognised European Standardisation Organisations (ESOs) – CEN, CENELEC or ETSI.

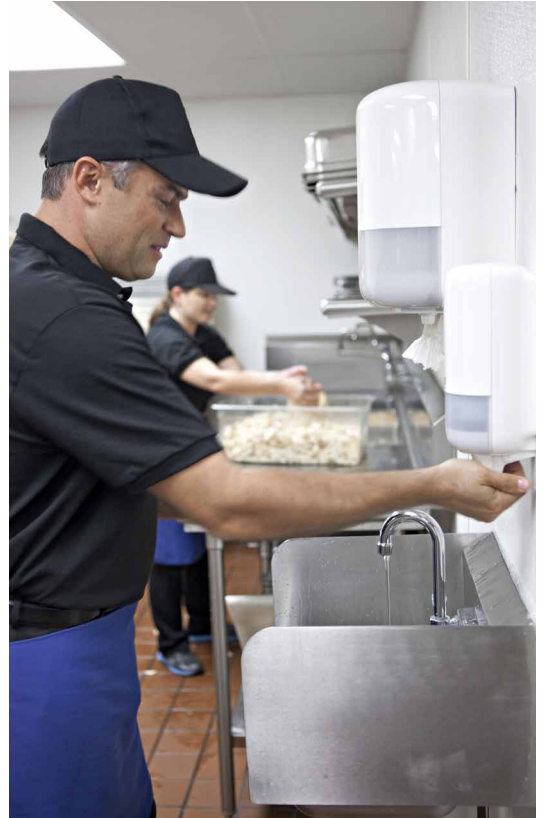

**EN1500** – indicates that the antimicrobial activity of hygienic handrub has been tested to ensure micro-organisms are reduced to safe levels.

**ISO** the International Organization for Standardization, promotes global standardisation for specifications and requirements for materials, products, procedures, formats, information and quality management. All products within the Tork range adhere to 9001 and 14001.

**Tork Soaps and Sanitisers are not tested on animals.**

# Liquid soap

When a thoroughly hygienic hand wash is required, the larger dose of liquid soap takes longer to lather and rinse off so it encourages an optimal 20 second hand wash.

## The benefits of Tork Liquid Soap

- Larger dose of liquid soap gets hands really clean
- Liquid Soap contains glyceryl oleate, a natural human skin lipid. It replenishes the skin's protective layer so hands are less likely to pick up dirt and micro-organisms
- No bacteria build up with sealed cartridge system

Arm lever option for hygienic, hands-free dispensing

Quick 3 second cartridge changeover

No bacteria build up with sealed cartridge system

Easy to use with soft-push dispensing

Larger dose for more thorough wash

## Mini Liquid soap

Small on space but big on hygiene. The compact size of the mini dispenser is perfect for smaller spaces while the larger dose of liquid soap promotes thorough hand washing.

### The benefits of Tork Mini Liquid Soap

- Mild soap and hair and body formulations as well as surface sanitiser
- Tork S2 dispenser is more compact for limited space
- No bacteria build up with sealed cartridge system

Easy to use with soft-push dispensing

Quick 3 second cartridge changeover

# Foam soap

Tork Foam soap provides an economical clean. Expect up to 150% more washes\* (2,500 per cartridge) than liquid soap with the lowest dosage available.

**The benefits of Tork Foam Soap**

- Reduce labour time by at least half through high capacity and quick cartridge changeovers
- Quick to lather and cleans and rinses easily
- Economical – smallest dose of soap per use of 0.4mL

Up to 150% more washes\*  
(2,500 per cartridge)

Quick 3 second cartridge changeover

No bacteria build up with  
sealed cartridge system

Anti-fingerprint protection to  
maintain a first-class impression

Easy to use with soft-push dispensing

\*When compared to standard 1,000mL liquid soap cartridges
